About AI Detection

Our AI Detector is the only enterprise-level solution that can verify if the content was written by a human or generated by AI, including source code and text that has been plagiarized or modified. [Learn more](#)

○ AI Text

A body of text that has been generated or altered by AI technology. [Learn more](#)

○ Human Text

Any text that has been fully written by a human and has not been altered or generated by AI. [Learn more](#)

Copyleaks AI Detector Effectiveness

Credible data at scale, coupled with machine learning and widespread adoption, allows us to continually refine and improve our ability to understand complex text patterns, resulting in over 99% accuracy—far higher than any other AI detector—and improving daily. [Learn more](#)

Ideal Text Length

The higher the character count, the easier for our technology to determine irregular patterns, which results in a higher confidence rating for AI detection. [Learn more](#)

Reasons It Might Be AI When You Think It's Not

The AI Detector can detect a variety of AI-generated text, including tools that use AI technology to paraphrase content, auto-complete sentences, and more. [Learn more](#)

User AI Alert History

Historical data of how many times a user has been flagged for potentially having AI text within their content. [Learn more](#)

AI Logic

The number of times a phrase was found more frequently in AI vs human text is shown according to low, medium, and high frequency. [Learn more](#)
